

Manteo Electronics Rental

If you are planning an outdoor wedding ceremony you should consider renting one of our sound reinforcement systems, so that your guests will be able to hear and enjoy the special ceremony that you have worked so hard to put together.

We have packages that use wireless belt pack transmitters with (Very Small) clip on microphones like you see on T.V. that can be concealed on clothing, and they sound great. Two of our low cost systems are even powered by a battery for that special beach wedding where you really need to have some sound reinforcement to be heard over the roar of the ocean.

I know that wedding costs are now a major concern, so one way you can save some money is by renting one of our wedding reception sound systems and using your I-pod type music player or a computer and creating your own play list to provide the music for the reception. This also allows the wedding couple to pick out the type of music that they want played during the different stages of the reception as well as control the volume and the amount of talk. This is also something you may want to consider to help offset the cost of having sound for your wedding ceremony if the budget seems to be getting out of control.

If you have any questions or would like to reserve your wedding date please email me at W4RDF@juno.com or just give me a call at 252-489-4742 and we can personally discuss your needs or questions. Hope to hear from you soon. If you get the recorder please leave your name and number and I will return your call, but email sometimes works the best for busy folks who may not be at home often.

Thanks, Robert De Freitas
